# Hardy Rock Plants

62,4

Hav alook Gardens
Fowlerville, Michigan.

### FOREWORD

If you do not find in this little catalogue, the plants for which you are looking, if you will write us no doubt we have them or can obtain them for you. We are growing hundreds of varieties not listed in this small booklet.

Our plants are of strong blooming size and if given proper care will give satisfaction in any garden.

On account of the great number of causes of failure over which we have no control, such as poor or improper soil, unfavorable weather careless culture etc., we can assume no responsibility after the stock leaves the nursery.

TERMS: Cash should accompany all orders. No order will be accepted for less than \$1.00.

We are happy at any time to have visitors call at our gardens. (Garden Clubs are very welcome. If possible let us know a few days in advance of your coming that we may make arrangements for your entertainment.)

Our gardens are located in the rich Livingston County dairy region, and are easily reached over the good gravel roads from the M 16 pavement. We are located three miles south and two and one-fourth miles west of the red light in the village of Fowlerville.

### LANDSCAPE DEPARTMENT

We are prepared to design and plant Alpine Gardens. Herbaceous Borders, Naturalistic rock gardens and the development of large or small places. Being growers we have made a study of the requirements of the different plants, this knowledge is necessary to attain the best results in landscape composition. Our men are experienced in planting, our prices moderate and we guarantee our work to give good results. Estimates gladly given.

ACHILLEA
MILLEFOLIUM ROSEA - Finely cut deep green foliage pink flowers in dense heads
pink flowers in dense heads  NANA - A v y dwarf plant, extremely fine cut foliage
heads of white flowers, very choice25
SEREICA - Neat grey hummocks of foliage, white
flowers, rare25 SERICEA - Silvery grey tomentose leaves dense

CORDATA -The large plume poppy, interesting for the back of the border

### BOLTONIA

LATISQUAMA -One the finest border plants blooming in early autumn with large single aster-like flowers of soft lavender. 5 feet 25

### CALAMINTHA

ALPINA -A good rock plant or for the edge of the border. Small purple flowers nearly all summer.

### CALLIRHOE

INVOLUCRATA Trailing plant with large saucer shaped flowers of bright rosy crimson, produced all summer.

### **CAMPANULA**

CALYCANTHEMA -The oldfashioned but indispensable cup and saucer Canterbury bells. Mixed colors only. .15
EARBATA -A beautiful Alpine with soft blue flowers freely produced. .35

CARPATICA -The familiar hare bell of Southern
Europe Large blue flowers on slender stems. .15
GARGANICA -Lovely in a sunny wall or rock crevice
great trailing mats which disappear under the masses of star-shaped blue flowers. 35

Soft lavender flowers on slender stems. A real gem. .35 PERSICIFOLIA -The peach leaved bell flower. Splen-

· ·
did spikes of salver shaped blue flowers. In June13 PERSICIFOLIA BACKHOUSEI -One of the best of the
things tried during the past year. Large clear, white
flowers on erect spikes.
PORTENSCHLAGIANA (MURALIS) -A trailing creeper with deep green mats of foliage hidden by a wealth
of clear purple bells. Our favorite rock plant 23
PSEUDO-RAINERI-Wide salver shaped flowers over tufts of pretty leaves
PUSILLA -Tiny thimble-like bells of blue on a six
inch high plant.
PUSILLA ALBA -White form of above ROTUNDIFOLIA -Blue bells of Scotland.
RADDEANA - Round, sharply toothed glossyleaves
branching sprays of violet bells .40 TURBINATA -Large wide open bells on short un-
branched stems, dainty blue
CENTAUREA  DEALBATA Boontiful goft mage mage and state of the state of
DEALBATA Beautiful soft rosy mauve flowers. Slen- did border plant, 18 to 24 inches
CERASTIUM
ALPINUM -Densely hairy leaves, not a rapid spreader.
spreader, BIEEERSTEINII -Splendid grey foliage and many
soft white flowers. Beautiful but too rapid spreader
to be planted near choice things15 COLUMNAE Foliage whiter than the above more
profuse in flowering and not invasive35
CERATOSTIGMA PLUMBAGINOIDES -Producing masses of leafy shoots
which break into heads of azure blue stars in early
autumn 35
CHEIRANTHUS LINIFOLIUSFor sunny walls or crevices, six to nine
inch wiry stems clothed in cold lilac flowers
from spring until winter .25 CHRYSOGONUM
VIRGINIANUM -A lovely early spring bloomer, gold-
en daisy like flowers CLEMATIS
TANGUITICA -The unusual Chinese yellow clematis,
drooping tell shaped flowers from July until autumn.
splendid for the large sunny rock garden 50 COCCINEA - Very unusual and worth while, coral red
flowers on a pleasing trailing vine, a good companion
to the above. CONVOLVULUS
MAURITANICUS -Too tender for exposed places but
truely worth a little extra care, fine true blue morning
glory blossoms in late summer and fall 25 CORONILLA
IBERICA -A dainty trailer with an unending succes-
sion of golden pea flowers in pretty heads 35 CORYDALIS
ACHROLEUCA -Beautifully cut foliage with small
yellow bleeding heart-like flowers. Foliage turns a
pleasing red in the fall 25 GLAUCA -Foliage of beautiful glaucious blue with
dainty jewel-like flowers of soft rose-tipped yellow 25
LUTEA - An all summer blocmer of clear soft yellow
with silvery, green foliage. Should be more often seen 35 COTYLEDON
UMBII LICUS -I ow tuffets of soft hairy leaves after
the fashion of a sempervivum. Odd . 15

.15

CRUCIANELLA forma de deintre
STYLOSA - A profuse ramper, foamy masses of dainty green with many round heads of pink flowers 25
CYCLAMEN
EUROPEUM -The hardu Cyclamen, very rare and
much too seldom seen, marbled foliage with pinkish red flowers  1.00
CHRYSANTHEMUM
The plants we offer are all of the so-called early
flowering sorts most of them being in full bloom by October 1.
ALADDIN-The novelty bronze so popular the past
two seasons blooming from mid August until frost 25
AMELIA -Lively pink flowers, fully double. Very early Uuusual and distinct.
BARBARA CUMMINGS-A splendid early deep yellow. 15
OCTOBER GIRL-Very clear rose, not as early as the above.
above15 NORMANDY-White slightly shaded pink very good
in either garden or for cutting
RUTH HATTON-The best white hardy sort to date 15
COREANUM -An unusual single, white aging to light pink, needs to become acclimated before showing
what it really can do.
COREOPSIS
LANCEOLATA - Valuable border plant, rich golden yellow.
DAPHNE CNEORUM -The finest of dwarf shrubs for
the rock garden pink, with exquisite fragrance. 1.00
DELPHINIUM  BELLADONNA IMPROVED -A fine variety for its
clear light blue flowers.
GOLD MEDAL HYBRIDS-Erect stiff stems with large
individual flowers. Mixed shades of light, medium and dark blue. Large clumps25
BLACKMORE AND LANGDON-Named varieties. We
offer a few plants each of about twelve selected varie-
ties. These are finer than any other Delphiniums we have seen in America 1.06
ZALIL-The much sought after yellow variety-Bloom-
ing size plants 1.00
DIANTHUS  ALPINUS -Large flowers of brilliant rose, likes a little
lime in loose loam.
ARENARIUS-Flowers white, deeply fringed and
fragrant 25 ARVENINSIS -A diminutive form of Caesius, neat,
flowers pink. three inches 25
CAESIUS -Makes wonderful mounds of grey green
foliage covered during June with quantities of dainty
pink flowers .25 CARTHUSIANORUM -A deep pink cluster head pink
very slender and dainty 25
CRUENTUS - Very unusual, deep blood-red flowers on
slender stems above a dense green tuft of foliage 25 DELTOIDES BRILLIANT -A much improved form of
the above, deeper in color .18
DELTOIDES ALBA -Like the type except flowers are
white with a ring of pale pink  NEGLECTUS -A true Alpine large clear rose flowers
reverse of petal, buff. whole plant not exceeding
three inches.
PLUMARIUS -The clove pink of old time borders, both
